

Features:

1. PC-210C Cylinder CNC Router is designed special for cylinder materials processing.
2. The most advantage of the machine is the working table can move and the gantry is fixed. In this way can ensure the high accuracy of the machine .
3. The machine adopts Japan Yaskawa AC brushless servo motor and driver,so the machine Can do the work for you easily,fast and perfectly.
- 4.The machine adopt Taiwan Linear guideway,it can prevent dust effectively.
5. Eight heads, high speed,it can process 3D craft and do some complex work.
6. It can also engrave 360 degrees human body model, Buddha and furniture.

Technical Parameter:

Model	PC-210C
Engraving Area	200*1200mm
Z working Area	350mm
Max engraving diameter	300mm
Max engraving length	1200mm
Max engraving speed	8m/min
Working voltage	AC220V/50HZ

Spindle power	2.2kw
Spindle rotating speed	0-24000rpm/min
Motor and driver	Japan YASKAWA AC brushless servo motor and driver
Weight	2000KG

Applicable industries:

Wood processing:processing of various furniture such as door,window,cbinet, craft wood door,screen and so on.

Advertisement:engraving and cutting various labels and number plate.

Art craft:engraving characters of any languages and graphics on gifts and souvenirs.

Applicable materials:

Wood,aluminum board,plastic,density board,wave board,PVC,acrylic,crystal, light marble and other nonmetal materials and light metal materials.
